How can we improve energy efficiency in the Alpine Space?

Interreg Alpine Space programme workshop

- Local and innovative solutions to improve energy efficiency: the use of biomass, microgrids and e-mobility solutions.
- Speakers:
 - Giacomo Gerosa, Full Professor at the Catholic University of the Sacred Heart in Brescia (IT), project BB-CLEAN
 - Cristina Cavicchioli, fellow researcher at the Research centre on Energy System - RSE in Milan (IT), project e-SMART
 - Patrick Biard, Head of International Affairs at the Auvergne-Rhône-Alpes Energy Environment Agency (FR), project ALPGRIDS

How can we improve energy efficiency in the Alpine Space?

Interreg

Alpine Space

Workshop outcomes

- Raise awareness about energy scarcity
- Capacity-building
- Work with local communities
- Financial support
- Enabling legal framework
- Cross-sectoral approaches in public administration
- Involvement of/call for action to policy makers
- New/innovative sources of energy
